Harvest

The grapes were harvested by hand at optimum grape maturity and transported to the winery in boxes of 12 Kg. The harvest took place on September 24th (Aragonez e Trincadeira) and October 8th (Alfrocheiro).

In the winery, after destemming and soft crushing, the grapes fermented, separately by variety, in large clay pots of 1,200-liter capacity.

Daily, until the end of fermentation, the "cap" of grape skins was "punched down" several times a day, even during the night. The wine and the skins remained in the large Talhas long after November 11th (St. Martin's day), thus fulfilling the tradition and regulations necessary for its certification. The 2013th blend was made with the wines produced in 3 large Talhas.
